

CISCO VIRTUAL INTERNSHIP

Data Analytics & Artificial Intelligence

Internship Presentation

Subhanshu Kumar

Roll No.: 25SCS1003005475 | Batch: 2025-2029

Student Details

Name: Subhanshu Kumar

Roll Number: 25SCS1003005475

Batch: 2025-2029

Internship Type: Virtual Internship

Organization: Cisco

Domain: Data Analytics & Artificial Intelligence

About the Internship

Structured virtual learning experience focused on Data Analytics and Artificial Intelligence.

Exposure to modern technology concepts through online learning and certification activities.

Focused on data, AI concepts, and AI-assisted insight generation.

Built an industry-oriented foundation for future technical projects.

Objectives

Build foundational knowledge of Data Analytics.

Understand Artificial Intelligence and modern AI concepts.

Explore AI-assisted analysis and insight generation.

Develop analytical thinking and problem-solving skills.

Gain exposure to industry-relevant technologies.

Strengthen the foundation for future AI and data projects.

Learning Journey

Data Analytics Essentials — fundamentals of data analytics and data-driven decision making.

Introduction to Modern AI — fundamentals and applications of modern Artificial Intelligence.

Find Insights with AI — AI-assisted approaches to discover meaningful insights.

Certification — completion of Cisco learning credentials.

Data Analytics Essentials

Learned the fundamentals of data analytics.

Understood the importance of data in decision-making.

Explored analytical thinking, patterns, trends, and interpretation.

Developed awareness of extracting useful information from data.

Introduction to Modern AI

Learned fundamental concepts of Artificial Intelligence.

Explored modern AI applications and use cases.

Developed introductory understanding of Machine Learning and Generative AI.

Learned about responsible use of AI.

Find Insights with AI

Explored AI-assisted approaches for analyzing information.

Learned how AI can help identify patterns and useful insights.

Understood how AI can support interpretation and decision-making.

Developed awareness of AI-powered analytical workflows.

Technologies & Concepts

Data Analytics

Artificial Intelligence

Modern AI

Generative AI fundamentals

Data interpretation and visualization concepts

AI-assisted analysis

Data-driven decision making

Skills Developed

Analytical thinking

Data interpretation

Understanding of AI fundamentals

AI-assisted insight generation

Problem-solving

Technical documentation

Self-paced technical learning

Certifications Completed

- ✓ Data Analytics Essentials
- ✓ Introduction to Modern AI
- ✓ Find Insights with AI

Learning Outcomes

Developed a clearer understanding of Data Analytics and Artificial Intelligence.

Learned how data supports informed decision-making.

Understood how AI can identify patterns and generate insights.

Improved confidence in exploring emerging technologies.

Built a foundation for future practical projects.

Internship Deliverables

Internship Completion Certificate – PDF

Internship Report – Word document

Internship Presentation – PowerPoint

Course and certification credentials

Conclusion

The Cisco Virtual Internship was a valuable learning experience in Data Analytics and Artificial Intelligence.

The completed modules strengthened my technical and analytical foundation.

The internship increased my awareness of modern AI applications and data-driven problem solving.

I look forward to applying these concepts in practical projects.

Thank You

Subhanshu Kumar
